Service for Hettich Centrifuges

Safety First

Centrifuges can be exposed to long hours of use 365 days per year in busy laboratories.

It can be very dangerous to use a centrifuge with a damaged rotor. Ensure maximum life of your centrifuge by undertaking regular preventative maintenance and calibration.

Tailored Service Agreements comprising of preventative maintenance and calibration and offering the following additional options:

- Calibration using a stroboscope (depending on model)
- Parts and Labour for all repair callouts
- Certificates of motor speed and temperature (depending on model)
- Extended Cover available at time of purchase of new equipment

Only the Best will do

• Cleaning and inspection of all functional internal and external parts

- Repairs and calibration to high standards
- Certificates of accuracy and precision available
- 12 months warranty on parts and labour
- Fast emergency call outs guaranteed
- All service work performed by Sartorius trained and authorised calibration engineers
- 80% completion of first visit repairs

Customers with Service Agreements are entitled to:

- 20% discount on Workshop Repairs
- Reduced Emergency Call Out Charges
